More than 24 years of experience in cardiothoracic and thoraco-abdominal vascular surgery. Have performed more than 20,000 surgeries with excellent results, of which more than 8000 are heart operations on children, includes newborn and infants.

Have to credit some 'first operations' in Karnataka and India, which includes complex heart operations performed on small children.

Experienced in Extra Corporeal Membrane Oxygenation (ECMO) technology and have to credit the first surviving patient to be successfully placed on a left ventricular assist device in Karnataka in 2002.

Having trained from the country's premier medical technological research institute, Sri Chitra Tirunal Institute in Trivandrum, played an important role in the development and clinical trial of India's indigenous artificial heart valve - the ttk Chitra valve.

Gained exposure in Germany (Leipzig) for minimal access surgery for valve repairs and replacements in children and adults.

Competent in thoracic aneurysm surgery and endo-vascular stenting, Beating heart coronary bypass operations through minimal access technique, ventricular restitution surgery and arrhythmia surgery. Presently focus is on paediatric cardiac surgery and minimal access surgery for valve repairs and replacements, and minimal access multi-vessel coronary bypass grafting on a beating heart and heart failure management.

Involved in quality control programs, member of the hospital infection control committee, OT users committee, and faculty to Rajiv Gandhi University for various paramedical and surgical courses, faculty to National Board cardiac surgical trainees.
