Cardiothoracic Junior Consultant

Kottayam Medical College : August 1990 to July 1991 - MS General  
Surgery

## **EXPERIENCE :**

I have more than 21 years of experience in cardiothoracic and thoraco-abdominal vascular surgery. Have performed more than 18,000 surgeries with excellent results, of which more than 10000 are heart operations on children, includes new born and infants. I have some 'first operations' in Karnataka and the south India to my credit, which includes complex heart operations performed on small children. I have vast experience in Extra Corporeal Membrane Oxygenation (ECMO) technology and have to my credit the first surviving patient to be successfully placed on a left ventricular assist device in Karnataka. Having trained from the country's premier medical technological research institute, Sri Chitra Tirunal Institute in Trivandrum, played an important role in the development and clinical trial of India's indigenous artificial heart valve which has made valve surgery affordable to thousands of poor Indian people. I also do valve repairs in children and adults. Having

worked with some of the country's stalwarts in thoracic aneurysm surgery, I am one among few surgeons in the country doing aneurysm surgery and endo-vascular stenting with good results. I do beating heart coronary bypass operations and ventricular restitution surgery, arrhythmia surgery. Presently I focus on paediatric cardiac surgery and minimal access surgery for valve repairs and replacements, and minimal access multi-vessel coronary bypass grafting on a beating heart.

**PRESENT POSITION:**

Consultant Cardiac Surgeon and Head Division of Paediatric Cardiac Sciences at Fortis Hospitals, Bannerghatta Road, Bangalore.

**SPECIAL INTEREST IN MINIMAL ACCESS (VALVE & CORONARY) CARDIAC SURGERY AND PAEDIATRIC CARDIAC SURGERY.**
