

Quiet Champions

Rotarians with a child-patient and his father at the hospital.

The hearts of the Rotarians of RI District 3190 beat for the innocent little children with ailing hearts

Nine months of a tiny life growing inside the mother's womb gives enough time for the entire family to fantasize about the baby and the kind of life the parents would want to gift

matter-of-fact tone, inform the parents that the child has a congenital heart defect! That then explains why the baby looked blue rather than pink and why the baby looked so run down and dull most of the time. All hopes and dreams

Congenital Heart Defect (CHD) is a defect in the structure of the heart that is present at birth and one in every 125 babies are born with congenital heart disease. Incidentally, CHD is the most common birth defect and is also
